Data Leakage
Discover your sensitive data leaked into the wild
Find out which confidential information is publicly available online

The average cost of a data breach has risen sharply in recent years, and with GDPR just around the corner, the cost of non-compliance can hit your balance sheet extremely hard.

Using our advanced Data Leakage detection module, discover if your organization’s sensitive documents have been leaked on the internet, deep web or P2P networks.

You can also discover unintentional data leakage, such as when employees have prepared internal presentations on a webservice or shared internal documents with poorly-secured file sharing providers.

Hunting down this information and demonstrating your detection capacities to regulators can vastly reduce your liabilities.

What business benefits does it deliver?

1. Mitigate penalties by improving your compliance with data privacy regulations
2. Give your security operations teams the tools they need to bring down incident response times
3. Better control BYOD policies and social document repositories

What does it do?

1. Detects information leaks from within your organization and from third parties, such as outsourced consultants, auditors and other partners
2. Delivers information found outside your perimeter, helping you plug leaks that have already happened and potential risks in the future
3. Enhances DLP protection without deploying or using additional FTE to monitor manually
Blueliv is Europe’s leading cyberthreat intelligence provider, headquartered in Barcelona, Spain. We look beyond your perimeter, scouring the open, deep and dark web to deliver fresh, automated and actionable threat intelligence to protect the enterprise and manage your digital risk. Covering the broadest range of threats on the market, a pay-as-you-need modular architecture means customers receive streamlined, cost-effective intelligence delivered in real-time, backed by our world-class in-house analyst team. Intelligence modules are scalable, easy to deploy and easy to use, maximizing security resource while accelerating threat detection, incident response performance and forensic investigations. Blueliv is recognized across the industry by analysts including Gartner and Forrester, and has earned multiple awards for its technology and services including ‘Security Company of the Year 2019’ by Red Seguridad, Enterprise Security and Enterprise Threat Detection 2018 category winners by Computing.co.uk, in addition to holding affiliate membership of FS-ISAC for several years.
