

# Dark Web

Search and track malicious activities on the Dark Web

*The web has many different dimensions, but some are more public than others*

Do you know what's lurking on the Dark Web? Boost your awareness of what's going on in the underground, observe malicious activities targeting your organization and proactively prevent future attacks.

Criminal groups organize themselves on the Dark Web, planning and exchanging tools and information before, during and after an attack. Gain an advantage by putting a spy in the enemy's camp: become better informed about criminals targeting your organization; proactively prepare countermeasures; find stolen user credentials.

## What business benefits does it deliver?

1. Strengthen your security posture by detecting and defending against malicious activity targeting your organization
2. Understand what type of information about your company is available on the Dark Web, to better predict and anticipate cyberattacks
3. Improve the investigation and remediation capabilities of your incident response team

# What does it do?

- Users can browse and search within .onion networks (such as TOR) and process a quarter of a million URLs per hour
- Continuously track Dark Web communication for mentions of your organization
- Searches underground sites for intelligence, including hacktivist ops, data leaks, malware attack vectors and illegal marketplaces

## About Blueliv

Blueliv is a leading cyberthreat intelligence provider, headquartered from Barcelona, Spain. We scour the open, deep and dark web to deliver fresh, automated and actionable threat intelligence to organizations, helping protect their networks from the outside in. Blueliv's scalable cloud-based technology turns global threat data into sophisticated, relevant intelligence. We enable organizations to save time and resource by accelerating incident response performance, providing user-friendly evidence accessible to all levels within cybersecurity operations teams. Our pay-as-you-need solution delivers an accelerated, predictive view of the threat landscape in real-time. We do not believe in a one-size-fits-all approach, and work together to configure a modular solution bespoke to your needs using separate intelligence modules, all backed up by our world-class in-house analyst team. Blueliv has been named 'Threat Intelligence Company of the Year' by Cybersecurity Breakthrough Awards, a Gartner 'Cool Vendor,' and Go-Ignite winner, in addition to holding affiliate membership of FS-ISAC for several years.
